

COURSE TITLE: Honors Human Anatomy

COURSE LENGTH: 1 semester

COURSE CREDIT: 0.5 credit

COURSE TYPE: elective

GRADE LEVEL: 11, 12

PREREQUISITE: B or higher in Biology,
Chemistry, or Physics

COURSE GOALS:

1. Students will collect information on the development and function of the skeletal system and identify the bones of human skeleton.
 2. Students will research the development and function of the muscular system and identify the muscles of the human body.
 3. Students will describe the development and function of the nervous system and identify structures of the nervous system.
 4. Students will explain the development and function of the circulatory system and identify the structures of the circulatory system.
 5. Students will describe the development and function of the respiratory system and identify the structures of the respiratory system.
 6. Students will explain the development and function of the reproductive system and identify the structures of the reproductive system.
-

COURSE CONTENT:

1. Skeletal system
2. Muscular system
3. Nervous system
4. Circulatory system
5. Respiratory system
6. Reproductive system
